SOFTWARE
as a SERVICE

COUNTERPART Technologies Inc.

Counterpart Technologies Inc. is a provider of innovative resource and technology management solutions.

Since inception in 2006, Counterpart has helped executives of large organizations across Canada and Europe understand and take control of their IT and shared service functions - saving them money, improving their processes, and reducing their environmental footprint.

Counterpart's consultants have extensive industry and best-practice experience. They provide the service and integrated tools to help you manage and achieve your IT and shared services business goals with confidence.

Counterpart's goal is to increase the value, contribution and profile of your function - by offering you services and solutions that help you better manage your technology resources and investments.

COUNTERPART SAAS

Resource & Technology Management

Are you managing your technology and shared services function effectively?

Top performing companies have daily up-to-date views of the operations of their resources, technology and investments; they know how much their services are costing them; and they maximize their vendor relationships.

Counterpart SaaS is an integrated, holistic, life cycle planning tool of the operations of your people, technology, projects and investments.

Core functionality includes:

- Budget Planning & Management
- Resource Planning & Management
- Service Asset Management
- Work Request Management
- Project Request Management & Business Case Assessment
- Vendor Relationship Management
- Executive Dashboards and Key Metrics.

Too much data, not enough information? Counterpart SaaS turns your data into decision making information - with Counterpart SaaS, you can realize value continuously from planning, through to execution, analysis and review.

Subscribe to Counterpart SaaS - optimize your function by managing your resources and technology effectively. Subscribe from as little as \$99 (CAD) per month.
